AVADA TERMINAL

Brand Guidelines

Primary Mark: Sharp dual blade A monogram (neon green → arcane purple) with full wordmark. The icon unfolds into the A (and V) of Avada — killing terminal friction while bringing life through AI.

Color System

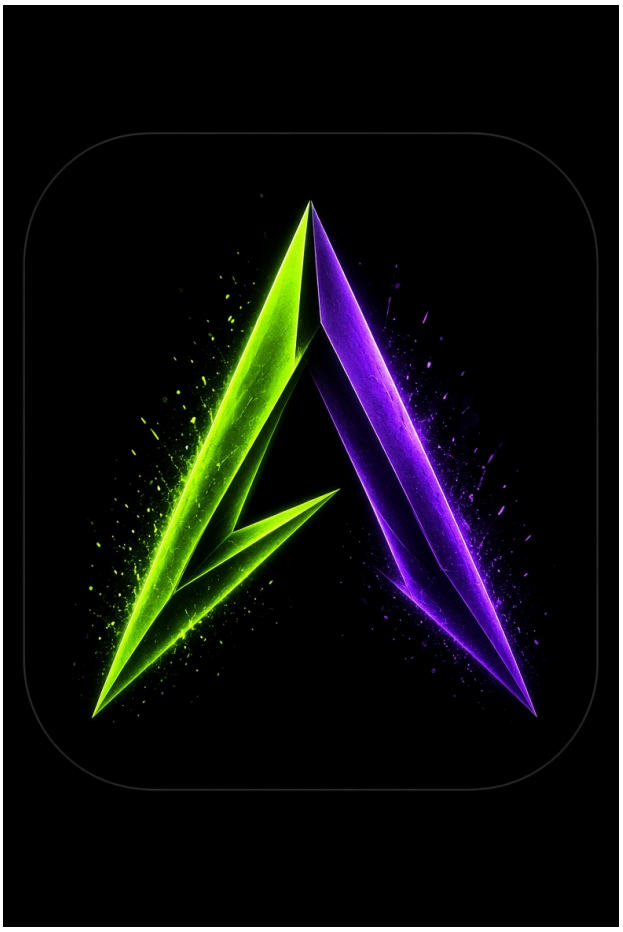

Role	Name	Hex	Usage
Background	Void Black	#000000	Primary backgrounds, icon fields
Primary Accent	Spell Green	#39FF14	Left energy, active states, success
Secondary Accent	Arcane Purple	#7B2CBF	Right energy, AI/magic states
Accent	Gold	#D4AF37	Subtle outlines, wordmark highlights
Text Primary	Soft White	#F5F5F5	Body text, wordmarks
Text Muted	Dim	#A0A0A0	Secondary UI text

CSS Variables

```
:root {
--avada-void: #000000;
--avada-green: #39FF14;
--avada-purple: #7B2CBF;
--avada-gold: #D4AF37;
--avada-white: #F5F5F5;
--avada-muted: #A0A0A0;
}
```

Logo & Icon System

Primary App Icon / Monogram: Sharp blade-like dual A. Hard edges, sizzling energy, green left → purple right. Readable at small sizes. This is the hero mark.

Animation Concept: The icon begins in a folded dual-blade state and unfolds into the full A monogram (with a complementary V form emerging). Duration ~0.3–0.5s, smooth exponential ease. Perfect for app launch, website hero, or loading states.

Usage Rules:
• Always on pure black or very dark backgrounds for maximum energy.
• Maintain clear space equal to at least 1/4 of the icon height around the mark.
• Do not alter the green-to-purple direction (left green, right purple).
• Gold is subtle only — never dominant.
• Favicon: use the simplified sharp A at 16/32/48/64/128/256/512 px.

Typography

Display / Wordmark: Cinzel or Cinzel Decorative (elegant serif with presence). Alternatively a custom sharp geometric for maximum alignment with the blade A.

UI / Interface: Inter or Geist. Clean, modern, highly legible at all sizes.

Terminal / Code: JetBrains Mono or Geist Mono. Sharp, technical, excellent for prompts and AI output.

Recommended Pairing: Cinzel (wordmark) + Inter (UI) + JetBrains Mono (terminal).

Terminal Theme (Hyper-compatible)

Background: #000000
Foreground: #F5F5F5
Cursor: #39FF14
Green: #39FF14
Magenta / Purple: #7B2CBF
Yellow / Gold: #D4AF37
Selection: #7B2CBF with 30% opacity

The dual energy language should appear in prompts, AI response accents, and status indicators.

Supporting System

Secondary Marks: Sharp dual chevron (prompt), simplified crystal (AI/living), horizontal energy beam. All use the same green-to-purple language and hard-edge treatment so they complement the primary A.

Website / Product Application: Pure black backgrounds, blade A + wordmark in headers, neon green for active elements and prompts, arcane purple for AI states, subtle gold for premium details. Tagline direction: “AI Terminal • Magical Intelligence” or “Terminal. Magic. Evolved.”

Icon Package: Deliver primary A monogram, wordmark lockups (horizontal and stacked), favicon set (multiple sizes), and a small set of secondary UI icons matching the sharp dual language.
